Arbeitsgemeinschaft
Elliptic Cohomology according to Lurie

Organizers: Paul Goerss, Evanston
             Jacob Lurie, Cambridge MA
             Thomas Nikolaus, Münster
Date (ID):   31 March – 06 April 2019 (1914)
Place: Mathematisches Forschungsinstitut Oberwolfach
Deadline: 01 December 2018
Contact: ag@mfo.de

Call for Application

The "Arbeitsgemeinschaft Deninger-Faltings" is a series of meetings in Oberwolfach taking place each year in spring and fall. The topic of the next meeting is chosen by democratic vote. The stay at Oberwolfach is free.

The Arbeitsgemeinschaft (study group) mainly addresses to non-specialists who want to broaden their outlook on mathematics and to junior mathematicians who wish to enter a field for future research. Experts are also welcome. The idea is "learning by doing" – similar to the Seminaire Bourbaki. Participants have to volunteer for one of the lectures described in the program of the Arbeitsgemeinschaft. After the deadline for application the organizers choose the actual speakers to give them enough time to understand the subject and to prepare for their lectures. Please see our website www.mfo.de for further details.

The MFO is grateful to Prof. Dr. Christopher Deninger (Münster) and Prof. Dr. Gerd Faltings (MPI Bonn) who lead the Arbeitsgemeinschaft.
