# Snapshots

of modern mathematics  
from Oberwolfach

Snapshots of modern mathematics from Oberwolfach explain mathematical problems and ideas in an accessible and understandable way. They provide exciting insights into current topics of the mathematical community for everyone who is interested in modern mathematics.

The snapshots are all written by real experts in their fields: participants of the scientific program at the Mathematisches Forschungsinstitut Oberwolfach (MFO) volunteer to explain an important aspect of their research. A team of editors assists them in communicating complicated matters to a broad audience.

The MFO publishes the snapshots for free download under a Creative Commons license at [www.mfo.de/snapshots](http://www.mfo.de/snapshots) and [www.imaginary.org/snapshots](http://www.imaginary.org/snapshots).

The snapshots aim at promoting the understanding and appreciation of mathematical research in the general public worldwide. They started as part of the mathematics communication project "Oberwolfach meets IMAGINARY".
