Combine your invitation to an Oberwolfach meeting with a visit to a European university

The Simons Visiting Professors (SVP) program is funded by the Simons Foundation (www.simonsfoundation.org). Each year, the program supports up to 32 Simons Visiting Professors: distinguished scientists from outside Europe, who wish to combine an invitation to an Oberwolfach Workshop, Mini-Workshop or Arbeitsgemeinschaft with a research visit to a European university for up to three weeks. The program provides each Simons Visiting Professor with support from Oberwolfach amounting to 150 Euro per day of the university visit. As a matching of this support, the participating university will be required to provide accommodation for the duration of the university visit as well as travel expenses within Europe between Oberwolfach and the university.

Interested researchers already invited to an Oberwolfach activity should contact their organizers. The SVP awards are decided by the director on suggestion of the organizers. See <http://www.mfo.de/scientific-programme/meetings/simons-visiting-professors> for further information.
