# Oberwolfach Research & Leibniz Fellows

The program “Oberwolfach Research Fellows” brings together small groups of researchers to carry out joint research in the stimulating atmosphere of the Oberwolfach Institute. Projects from all areas of mathematics can be supported. Interdisciplinary cooperation is especially encouraged.

Groups of 2-4 researchers can apply. Not all should come from the same place. The possible length of stay is 1-4 weeks. The research stay may include a cooperation with a parallel research group at another place in the world, realized with videoconferencing tools.

*“We were looking for an opportunity for a focused period of work together. We went in with very high expectations, but it was even better than expected!”*

*“MFO is a great place for doing research. The library and other facilities are excellent and the atmosphere is very stimulating.”*

Early career researchers may apply for an additional Leibniz Fellowship

Benefits include financial support up to a postdoctoral salary, depending on an existing position, the possibility to apply as an individual researcher and the possible length of stay of 4-12 weeks, which could also be split in up to 3 periods.
