

# Submission of Manuscripts

## Manuscript typesetting

Preferably, manuscripts should be typeset in LaTeX. Springer provides templates for LaTeX users that help structure the manuscript, e.g., define the heading hierarchy. Predefined style formats are available for all the necessary structures that are supposed to be part of the manuscript, and these formats can be quickly accessed via hotkeys or special toolbars.

The usage of these templates is not mandatory. Alternatively, you may either use the standard LaTeX book class or article class and apply the default settings and styles (e.g., for heading styles, lists, footnotes, etc.).

Producing your book in several formats is reflected in the preparation of the manuscript and means that the LaTeX, manuscript files we receive will be converted to XML and re-formatted according to the Springer branded style. This way, the book can be published in several formats (eBook, printed copy, ePub for iPad, Kindle edition etc.).

## Figures

Illustrations will be available in full color both in the eBook and in the printed book.

Each figure must be accompanied by a caption and will be placed on the top of the page where it occurs.

## Number of pages

There is no limit on the number of pages.

## Abstracts

To facilitate online searching, using e.g. Google, please provide an abstract for each of your chapters. Abstracts will appear online with unrestricted access and enable unregistered users to read the abstract as a teaser for the complete chapter.

## Timeline

There is no predefined timeline for the preparation of your manuscript. You can determine a manuscript delivery date that suits you best.

## About the authors

For the frontmatter section “About the authors”, a portrait picture and a short bio of each of the authors is welcome.

## Third party permissions

If any third-party material, in particular images from other sources are used, permission from the copyright holder (usually the original publisher) must be obtained.
