Combine your invitation to an Oberwolfach Workshop with a visit to a European university

A new program at Oberwolfach has started in January 2014 which is funded by the Simons Foundation (www.simonsfoundation.org): the Simons Visiting Professors (SVP).

The program annually supports up to 40 Simons Visiting Professors, distinguished scientists from outside Europe, who wish to combine an existing invitation to an Oberwolfach Workshop with a research visit to a European university of up to two weeks. The SVP program will provide support amounting to 135 Euro per day of the university visit. As a matching of this support, the participating university will be required to provide accommodation for the duration of the university visit as well as travel expenses within Europe between Oberwolfach and the university.

Interested researchers already invited to an Oberwolfach Workshop should contact their workshop organizers. The SVP awards are decided by the director on suggestion of the workshop organizers. See <http://www.mfo.de/scientific-programme/meetings/simons-visiting-professors> for more information.
